

HYBRID FEATURES

- 5-7% improved starch digestibility over a dual-purpose hybrid
- 30,000 or less ppa for optimal digestibility and tonnage
- Excellent choice when you need insect protection
- Works well across most yield environments

POSITIONING GUIDE

- Soils - Medium to High Yield Environments
- On extreme sandy soils use the best management practices for the area
- Plant for final stand of 30,000 plants per acre or less in 30 inch rows
